

## HD Digital Satellite Receiver

This digital HD receiver is a compact receiver which give crystal clear reception of your TV and radioprograms via satellite. Due to his small size, the device can be easily mounted behind a TV set. The external channel display shows you the current TV or radio program. The channel display also has a built-in infrared sensor which respond the included remote control (RCU).

Thanks to the external 12V power adapter, this receiver is ideal for camping.

Via USB contents of external storage media

(USB stick or hard disk) can be played. An optional Wi-Fi antenna allows you to connect the receiver to the Internet.

# DVB S2®
